\*Ora perhaps produces higher grain yields than any variety in the South. Proving most popular in Ark., etc. Excellent for grazing also.

NOTE:—The uncertified Oras and Moregrains above came from fields making high yields—some around 100 bu. acre. They and the Suregrains are reasonably bright and heavy. Extra good. All our oats are high purity and germination.

### PLANTER BOX TREATMENT

. . . on untreated oats, rye and wheat will pay, and pay big, controlling disease and in increasing yields! Use 2 oz. of CERESAN M-DB per bu. A pink powder. Easy to use. Mix in drill box as plant. This avoids having any treated seed left that you cannot feed. "OVER" for M-DB PRICES.
